## PROFESSIONAL SUMMARY

Frontend Developer with 4+ years of experience building scalable web applications using React.js, TypeScript, and modern frontend architecture. Skilled in reusable component development, Redux & React Query state management, API integration, and performance optimization within Agile environments.

---

## WORK EXPERIENCE

**SoftwareDeveloper / Frontend Developer – Effiasoft Pvt. Ltd.**

**April 2025 – Present**

- Develop and maintain enterprise travel booking platform using React.js and TypeScript.
- Implemented complex filtering and sorting systems for flight and rail search experiences.
- Built reusable Material UI components and custom hooks improving code maintainability
- Used Redux and React Query for state management, API caching, and synchronization
- Implemented Auth0 authentication and multilingual support using i18next.
- Collaborated in an Agile/Scrum environment using Jira for project management, Git for version control, and CI/CD pipelines for continuous integration and deployment.

### **Project: GetGoing (BCD Travel)**

- Corporate travel booking application enabling search, filtering, and itinerary management.
- Enhanced UI scalability and improved overall user experience.

**Associate Frontend Developer – Magazine3 Technology**

**February 2022 – March 2025**

- Developed responsive React.js interfaces and reusable components.
- Integrated REST APIs for dynamic UI updates.
- Improved performance and resolved UI/UX issues.
- Contributed to Sath.io and WPQuads platform enhancements.

### **Projects: Sath.io & WPQuads**

- Contributed to frontend development, usability improvements, and feature enhancements.
- Maintained UI consistency and supported ongoing platform improvements.

---

## EDUCATION

**Master of Business Administration (MBA) – IT and Systems Management**

**July 2021 - July 2023**

NMIMS Global Access - School for Continuing Education

**Bachelor of Science**

**May 2021**

Singhanian University

---

## TECHNICAL SKILLS

- **Frontend:** React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3
- **State Management:** Redux, React Hooks, Context API, React Query
- **APIs:** REST APIs, Axios, API Caching
- **UI:** Material UI, Responsive Design, Component Architecture
- **Tools:** Git, Jira, CI/CD, Agile/Scrum
- **Concepts:** Lazy Loading, Code Splitting, Error Boundaries, PWA, Performance Optimization
